FORMATION

2025 - Multiplatform Application Development (DAM)
Ilerna - Barcelona

2024 - Graphic Design
LaLlotja-Barcelona / Arte 10 - Madrid

EXPERIENCE

2026 - PRESENT
Backend Software Developer — Onlygal

- Developing backend systems using Java and Spring Boot
- Designing and implementing REST APIs
- Working with PostgreSQL and data persistence
- Applying clean architecture principles in a modular system

PROJECTS

Belgem Backend
Backend systembuilt with Java and Spring Boot using a modular architecture.

- REST API development
- Database integration (PostgreSQL)
- Clean Architecture (Hexagonal approach)

Maps App
Android application focused on map interaction and marker management.

- Built with Kotlin and Jetpack Compose
- Integrated map functionality and user interaction
- Backend integration with Supabase

SongSwipe
Mobileapp inspired by swipe-based interaction for music discovery.

- Developed with Kotlin and Jetpack Compose
- Focus on UI/UX and interaction design
- API integration for dynamic content
